(54) Title: BAIT BOX

(57) Abstract: A bait box (10) has a housing (12) and a lid (14) which can be fitted to the housing (12). The lid (14) can be moved between a locked and closed position and an unlocked and open position. A locking means (34) is provided between the housing (12) and the lid (14). The locking means (34) has one or more locking members (40) which can be releasably secured to the housing (12) or the lid (14). The or each locking member (40) and the other of the housing (12) and the lid (14) having interengageable formations (48, 90) which can be used to lock the housing (12) and the lid (14) to each other. The or each locking member (40) can be released from the housing or the lid and can be removed from the housing (12) or the lid (14) when the lid (14) is in the unlocked and open position.
